

The Trusted Biometrics Provider

Since our founding in 1982, Identix has become the largest pure multi-biometric technology supplier to government and law enforcement agencies and corporate enterprises around the world. Our broad range of fingerprint and facial biometric systems, coupled with our commitment to innovation and customer support, make Identix the provider that end users and system integrators turn to for their biometric identification needs.

We are innovators; proud of our “list of firsts” in live scan and mobile identification, and proud of our performance in independent government tests and evaluations that confirm that our finger and face technologies are best-of-breed.

We are visionary leaders; paving the way for the development of industry standards and understanding the need for scalable, interoperable solutions.

Most important, we are your valued partner, developing easy to integrate modules that exceed end user requirements.

Our solutions deliver high-value, not just because they are based on leading technology and provide superior results, but also because they are backed by our 20+ years of experience and our unmatched service and support team. This is what makes us different. This is why we can say we are “The Trusted Biometrics Provider.”

Quick Facts

Date Founded:	1982
Number of Employees:	~500
NASDAQ Symbol:	IDNX

Office Locations:
Minnesota, New Jersey,
Virginia, California,
United Kingdom

History

- 1982 Identix founded.
- 1985 Identix goes public. Digital Biometrics formed and introduces new live scan system to the market.
- 1986 Identix introduces first biometric access control devices.
- 1989 Identix introduces initial live scan products.
- 1990 Identix wins large contract from California Department of Justice (now second-largest deployment of live scan in the world with 700+ units to date).
- 1994 Visionics Corporation formed to commercialize facial recognition technology capability.
- 1996 Visionics introduces Facelt PC and wins Best of Show/ Best New Technology at COMDEX Fall trade show.
- 1999 Identix acquires Identicator Technology, entering the commercial security space.
- 2000 Visionics Facelt technology used for the first time to eliminate fraud in nationwide voter registration system.
- 2001 Visionics and Digital Biometrics merge to form the publicly-traded Visionics Corporation.
- 2002 Visionics and Identix merge to create the world's leading multi-biometric security technology company.
- 2004 Identix acquires 100% ownership of fingerprint services joint venture and renames subsidiary, Identix Identification Services. Also acquires technology assets of Delean Vision, adding skin into its portfolio of biometric technologies.

Why Identix®

One Stop Shop:

Broad range of biometric product and services offerings from live scan to facial search platforms, mobile identification, biometric authentication modules and fingerprinting services.

State-of-the-Art Technologies:

Industry leading fingerprint, facial recognition and skin technologies that are top performers in independent evaluations.

Standards Compliance:

Driving the establishment and compliance with national and international standards and specifications.

Support:

Nationwide field service centers, 24/7 help desk and unmatched professional services team provide extensive support for pre and post sale, proof of concept, onsite requirements, installation and training.

Unrivalled Experience:

More than 20 years experience in deploying biometrics solutions.

Product Family

TouchPrint™ Enhanced Definition 3000 Series

Taking image quality to a higher level for maximum AFIS performance, fewer rejections and more consistency across subjects and operators.

The TouchPrint™ Enhanced Definition 3000 Series features a patented, FBI Appendix F certified full hand scanner – able to capture all the critical areas of the hand, from the carpal crease to the fingertips in a single, intuitive step.

Provides:

- Better data capture
- Maximum reliability
- More consistency in the field

IBIS™ Mobile Identification System

Gets information in the hands of field officers when and where they need it.

This dual biometric system captures photos and forensic quality fingerprints and transmits the data wirelessly for search against multiple databases. Results are returned to the handheld in minutes.

Helps to:

- Save time
- Increase officer safety
- Help prevent false arrest

ABIS™ System

Makes it easy to build scalable, biometric identification solutions.

This state of the art biometric search engine employs Identix industry-leading Facelt® technology with a unique standards-based software architecture that integrates with existing databases and workflows.

Delivers:

- Accurate, fast facial ID information
- Built-in redundancy
- Modular, scalable architecture

20+ Years Experience Deploying Biometrics

Sample deployments include:

Colorado DMV - Facial recognition for eliminating duplicate IDs

Department of Homeland Security Bureau of Citizenship and Immigration Services (BCIS, formerly INS) - More than 1200 live scan systems deployed to facilitate background checks for citizenship applicants, asylum seekers and secondary inspection at border crossings

DoD/DEERS/RAPIDS - Fingerprint enrollment of more than 5.4 million people for identity verification at benefits disbursement

DoD/Common Access Card
Demonstrated 100% Match-on-Card capability in series of trials

Indianapolis Police Department
Full hand scanner deployment

Mexico - Facial recognition for eliminating duplicate voter registrations

New Delhi, San Salvador
Fingerprint recognition to prevent fraudulent drivers' licenses

Ontario, Redlands and Portland Police Departments and Hennepin County Sheriff Department - Mobile identification system deployments

Saudi Aramco - Identity management solution with live scan

Serbia - Facial recognition to eliminate fraud in national ID system

Sharp Healthcare - Fingerprint deployment for protection of patient records; largest known deployment of biometrics in healthcare

Also Available

- Multitude of fingerprint readers ranging from low cost desktop devices to high end, 500 dpi readers for large scale verification and enrollment applications
- Software Developer Kits
- 100% Match on Card Technology
- Fusion Technology
- Information security software
- Facial surveillance software

Service Offerings

Professional Services - Specializing in custom solutions, integration and consulting and program management. Offerings include image quality analysis, evaluation of biometric enrollment processes, system analysis and design, application development, software customization, installation, training, 24/7 help desk and onsite field service support.

Identification Services - Outsourcing solutions for corporations and government agencies requiring fingerprint background checks. Identix Identification Services maintains a network of processing centers in key locations across the country. Certified technicians efficiently process applicants and also provide card scan and onsite scheduling and processing.
